

Vixen[®]

For over 60 years we've brought you the stars,

so what's a few hundred yards.

SPORT OPTICS

Introduction

Since the company was established in 1949, Vixen® has remained one of the premier astronomical product manufacturers in the world. We have accomplished this through innovation, dedication and a firm commitment to producing an affordable product that delivers unsurpassed performance. With the establishment of Vixen Sport Optics we now offer the American outdoor enthusiast a complete lineup of top quality, riflescopes, binoculars and spotting scopes to meet or exceed the needs of even the most demanding user. No matter what your outdoor passion, Vixen Sport Optics has a product to help you get the job done!

Series VIII

All Vixen® riflescopes are engineered and built in Japan for superior quality and performance

Features:

- 6x magnification range
- Fully multi coated lenses for maximum image brightness and clarity
- Nitrogen purged for complete fog proof, waterproof performance
- Constructed of high quality aviation grade aluminum to ensure long lasting durability under extreme conditions
- Rapid focus diopter adjustment design for improved target acquisition
- Illuminated, Glass etched, American style second focal plane reticle placement for precise aiming and long lasting performance
- Finger-tip adjustable, Zero=resettable Windage & Elevation knobs
